### **DETAILED ACTION**

1. Claims 4, 10, 15, and 17-28 are pending for examination.
2. The cross reference related to the application cited in the specification must be updated (i.e. paragraph [0001], update the relevant status of 09/729515, 09/884280, 09/976930) with US patent number where applicable.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 4, 10, 15, 17-19, 22, 25, and 27 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 2-3, 18, and 28-31 of U.S. Patent No. 7185340. Although the conflicting claims are not identical, they are not patentably distinct from each other. It is noted that the difference are minor encompass replacement of the recitation of the limitations in the claims and it appears to be substantially the same or in some instance obvious over one another. For example, claims 4, 10, 15, 17-19, 22, 25, and 27 functions performed by the steps are the same as the steps of claims 2-3, 18, and 28-31 of U.S. Patent No. 7185340.

#### ***Claim Rejections - 35 USC § 101***

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claim 15 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

7. Claim 15 is rejected under 35 U.S.C. 101 because the claimed invention are directed to system claim, but appearing to be comprised of software alone without claiming associated computer hardware required for execution (i.e. memory for storing the tree data structure). For example, claim 15 recited a plurality of means for (i.e. means for tracking, means for rebalancing), but according to the specification (paragraph [0053]), the recited means for are computer code (i.e. software module). The system comprises only software modules is software system. Thus claim 15 is directed to non-statutory subject matter.

#### ***Allowable Subject Matter***

8. Claim 15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 101, set forth in this Office action. Claims 4, 10, 15, 17-19, 22, 25, and 27 would be allowable if timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d).

#### ***Conclusion***
